TOUR OVERVIEW

Boat ride west of Puerto Villamil and experience the unique tunnels created by Sierra Negra. An amazing and exciting site to visit, the Tunnels are characterized by above water and underwater lava bridges, tunnels and arches. This site is unique and only found in Isabela. You will be able to enter the area to explore some of these formations up-close. Keep your eye open for turtles, penguins, blue footed boobies, sea lions and sharks which can be regularly seen passing through. It is a good place to explain about native vegetation of the arid zone, since there are trees like matazarno and palo santo.

Later, we moved to the site known as Finados to perform snorkelling with sea turtles, sharks

A woman with blonde hair, wearing a black wetsuit and a blue snorkel mask, is swimming underwater. She is looking towards the camera. In the foreground, the large, dark, patterned shell of a sea turtle is visible. The water is clear and blue.

“Tintoreras”, golden stripes, eagle rays, Caballitos de Mar, fish such as Surgeons, Damicelas. The tour includes a light box lunch on the boat after having done both activities, after lunch we prepare for the return to Isabela.
