TOUR OVERVIEW

1. Puerto Chino is a sandy white beach located 24.5 km from Puerto Baquerizo Moreno and because of this distance, an entire day is required to really enjoy it.
2. The beach is an excellent place for recreation and rest. In addition, it is an ideal place to spot marine birds feeding as frigatebirds and blue-footed boobies.
3. The current here is often very strong so stay out of the water if the red or even yellow flag is up.
4. It is very important to bring water to drink, a hat and sun protection. The reflection of the sun in the white sand is very strong.
