TOUR OVERVIEW

We continue by a paved path heading up to Frigate bird Hill from behind the center. Named for the colonies of Frigate birds nesting in the trees, Frigate bird Hill has a small network of hiking trails that lead to a panoramic lookout above a protected cove that is excellent for snorkeling. There is also a sea town from this vantage. Continuing on from the hill, we pass by a statue of Charles Darwin and eventually to Playa Carola where we appreciate the famous for its light house on the point Playa Carola, a good spot to swim with Sea Lions and soak in the sun.
